SHEP PLASTICS TAKES DELIVERY OF NEW SANDRETTO SERIES 9 300T MACHINE

Sussex – based SHEP PLASTICS has taken delivery of a new Sandretto Series 9 machine in order to increase their plant capacity.

CEO, Malcolm J Bradshaw, said that “The success in attracting new customers and expansion by existing ones since the beginning of 2001 has meant a full order book and, at times, shortage of capacity.

Our total support and flexible approach to customer requirements has created an unprecedented increase in demand for our services.

Further capital investment will take place later this year when we look to expand our robotics operations and assembly unit”.
