

# SHEP PLASTICS LIMITED celebrates its 25<sup>th</sup> Anniversary in April 1999.

Still a family controlled company it has grown from a one-man, one-machine company into a company with pedigree employing 78 people and 17 modern injection moulding machines.

The company, based in Hailsham, East Sussex, has a large clientele using their **COMPLETE INJECTION MOULDING SERVICE**.

Supplementing the modern injection moulding machines are extensive ancillary equipment that allows finishing, printing, assembly, ultra-sonic welding and stock handling facilities normally found in companies twice their size.

Other services they offer include component design, model making and electrical assembly.

Over the years the company has developed strategic supply partnerships with many Blue Chip customers – with the emphasis on quality of product and service, having gained ISO 9002 accreditation in 1988. And, more recently, they gained UL approval for USA-bound product.

With a current turnover of £3 million they are now looking to the next 25 years.
